

Mechanical behavior of Engineering Materials

| 1. GENERAL | | | |
|---|---|--------------------------------|--------------------------|
| SCHOOL | Faculty of Sciences in collaboration with Faculty of Engineering, Aristotle University of Thessaloniki | | |
| DEPARTMENT | Materials Science and Engineering | | |
| LEVEL OF STUDIES | ISCED level 7 (5-year Integrated Master's programme) ISCED level 6 (4-year BSc programme) | | |
| COURSE CODE | MSEN 505 | SEMESTER | 5 th Semester |
| COURSE TITLE | Mechanical behavior of Engineering Materials | | |
| TEACHING ACTIVITIES Lectures, tutorials/problem sessions, laboratory/computer exercises (where applicable), case studies and guided self-study. | | TEACHING HOURS PER WEEK | ECTS CREDITS |
| | | 4 (3L + 1T) | 6 |
| COURSE TYPE | Mandatory / Scientific area / Skills development | | |
| PREREQUISITES | No prerequisites | | |
| TEACHING AND EXAMINATION METHODS | Face-to-face lectures and guided problem-solving sessions; short in-class quizzes; final written examination. | | |
| COURSE OFFERED TO ERASMUS STUDENTS | Yes | | |
| COURSE URL | https://elearning.auth.gr/course/view.php?id=xxxxx | | |

| 2. LEARNING OUTCOMES | |
|--------------------------|---|
| Learning Outcomes | <p>By the end of this course, students will be able to:</p> <ul style="list-style-type: none"> • Understand stress, strain, and displacement as fundamental quantities for the design of structural members. • Analyze and calculate structural stability, specifically regarding column buckling • Apply these concepts to the design and analysis of both statically determinate and indeterminate structures subjected to tension, compression, bending, shear, torsion, and combined loading • Utilize energy methods (such as Castigliano's theorems) for the analysis and design of structural members. |
| General Skills | <ul style="list-style-type: none"> • Search for, analysis and synthesis of data and information, with the use of the necessary technology • Work autonomously • Advance free, creative and causative thinking • Adapting to new situations • Decision-making • Modeling and solving real-world problems • Working in a multidisciplinary environment |

3. COURSE CONTENT

Description:

This course establishes the fundamental principles required to analyze the mechanical behavior of solid bodies under load. Bridging the gap between static equilibrium and structural design, students will explore the relationships between external loads, internal stresses, strains, and deformations. The course emphasizes the sizing and analysis of structural members—both statically determinate and indeterminate—subjected to various loading conditions, including tension, compression, bending, and torsion.

Key topics:

- Stress & Strain Analysis.
- Fundamental Loading Conditions.
- Combined Loading & Indeterminacy
- Structural Stability (Buckling)

4. LEARNING & TEACHING METHODS – EVALUATION

| Teaching method | Face-to-face. | | | | | | | | | | | | | | | | |
|------------------------------|--|----------|---------------------------|----------|----|------------------------------|----|-----------------------------|----|-------------------|----|------------------|----|--------------------|---|--------------|------------|
| Use of ICT | Use of ICT in Course Teaching, Use of ICT in Communication with Students Description: Use of Information and Communication Technologies (ICT) in teaching the course with tools of modern distance learning (MS-Teams) and asynchronous education (e-learning). Use of learning aids based on ICT: Excel Use of ICT in student assessment: Electronic grading (e-learning). Use of ICT in communication with students: e-learning, email, MS-Teams. | | | | | | | | | | | | | | | | |
| Teaching organization | The supervised and unsupervised workload per activity is indicated below (total workload complies with ECTS standards). <table border="1" data-bbox="523 1272 1337 1552"> <thead> <tr> <th>Activity</th> <th>Workload/semester (hours)</th> </tr> </thead> <tbody> <tr> <td>Lectures</td> <td>39</td> </tr> <tr> <td>Tutorials / problem sessions</td> <td>13</td> </tr> <tr> <td>Short assignments / quizzes</td> <td>10</td> </tr> <tr> <td>Independent study</td> <td>70</td> </tr> <tr> <td>Exam preparation</td> <td>16</td> </tr> <tr> <td>Final written exam</td> <td>2</td> </tr> <tr> <td>Total</td> <td>150</td> </tr> </tbody> </table> | Activity | Workload/semester (hours) | Lectures | 39 | Tutorials / problem sessions | 13 | Short assignments / quizzes | 10 | Independent study | 70 | Exam preparation | 16 | Final written exam | 2 | Total | 150 |
| Activity | Workload/semester (hours) | | | | | | | | | | | | | | | | |
| Lectures | 39 | | | | | | | | | | | | | | | | |
| Tutorials / problem sessions | 13 | | | | | | | | | | | | | | | | |
| Short assignments / quizzes | 10 | | | | | | | | | | | | | | | | |
| Independent study | 70 | | | | | | | | | | | | | | | | |
| Exam preparation | 16 | | | | | | | | | | | | | | | | |
| Final written exam | 2 | | | | | | | | | | | | | | | | |
| Total | 150 | | | | | | | | | | | | | | | | |
| Student evaluation | Written Exams with Problem Solving with Short Answer Written Exams with Problem Solving (Summative) | | | | | | | | | | | | | | | | |
