

Solidification, Casting and Welding

1. GENERAL			
SCHOOL	Faculty of Sciences in collaboration with Faculty of Engineering, Aristotle University of Thessaloniki		
DEPARTMENT	Materials Science and Engineering		
LEVEL OF STUDIES	ISCED level 7 (5-year Integrated Master's programme) ISCED level 6 (4-year BSc programme)		
COURSE CODE	MSEN 811	SEMESTER	8th Semester
COURSE TITLE	Solidification, Casting and Welding		
TEACHING ACTIVITIES	Lectures, tutorials/problem sessions, laboratory/computer exercises (where applicable), case studies and guided self-study.	TEACHING HOURS PER WEEK	ECTS CREDITS
		4 (3L + 1Lab/Demo)	6
COURSE TYPE	Scientific area / Skill development		
PREREQUISITES	Thermodynamics; Introduction to Materials Science and Engineering; Phase diagrams basics.		
TEACHING AND EXAMINATION METHODS	Lectures with demonstrations; problem-solving; lab-style assignments on defects and microstructure; final written exam.		
COURSE OFFERED TO ERASMUS STUDENTS	Yes (taught in English, subject to minimum enrollment).		
COURSE URL	https://elearning.auth.gr/course/view.php?id=xxxxx		

2. LEARNING OUTCOMES	
Learning Outcomes	<ul style="list-style-type: none"> • Relate solidification conditions to microstructure evolution (grain structure, segregation, dendrites). • Explain casting process families and select suitable routes based on geometry, alloy, and quality requirements. • Identify common casting defects and propose preventive and corrective actions. • Describe the fundamentals of welding processes and heat-affected zones and link them to microstructure and properties. • Assess residual stresses, distortion, and cracking risks in cast/welded components. • Apply basic process-selection and quality-control reasoning for industrial components.
General Skills	<ul style="list-style-type: none"> • Process understanding linked to microstructure and performance • Problem solving using simplified heat-transfer and solidification concepts • Quality mindset: defects, inspection, and standards awareness

	<ul style="list-style-type: none"> • Technical reporting based on case studies
--	---

3. COURSE CONTENT

- Solidification fundamentals: nucleation, growth, thermal gradients, cooling rates.
- Segregation and constitutional supercooling; dendritic structures; grain refinement.
- Casting processes: sand, investment, die casting, continuous casting; gating and risering concepts.
- Solidification defects: porosity, shrinkage, hot tearing; defect prevention strategies.
- Microstructure control through alloying, inoculation, and heat treatment (overview).
- Welding fundamentals: energy sources and key processes (arc, resistance, laser) (overview).
- Weld metallurgy: fusion zone and heat-affected zone; solidification cracking and transformations.
- Residual stresses, distortion, and welding defects; inspection and quality assurance overview.
- Case studies linking processing to component failure and reliability.

4. LEARNING & TEACHING METHODS - EVALUATION

Teaching method	Face-to-face. Lectures, demonstrations, guided problem sessions, and case-study-based assignments.																
Use of ICT	E-learning for notes; video demonstrations; basic process simulation/visualization datasets (where available); spreadsheets for simplified solidification calculations.																
Teaching organization	<p>The supervised and unsupervised workload per activity is indicated below (total workload complies with ECTS standards).</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 70%;">Activity</th> <th style="width: 30%;">Workload/semester (hours)</th> </tr> </thead> <tbody> <tr> <td>Lectures</td> <td style="text-align: center;">39</td> </tr> <tr> <td>Laboratory demonstrations / tutorials</td> <td style="text-align: center;">13</td> </tr> <tr> <td>Case-study assignment / report</td> <td style="text-align: center;">16</td> </tr> <tr> <td>Independent study</td> <td style="text-align: center;">64</td> </tr> <tr> <td>Exam preparation</td> <td style="text-align: center;">16</td> </tr> <tr> <td>Final written exam</td> <td style="text-align: center;">2</td> </tr> <tr> <td>Total</td> <td style="text-align: center;">150</td> </tr> </tbody> </table>	Activity	Workload/semester (hours)	Lectures	39	Laboratory demonstrations / tutorials	13	Case-study assignment / report	16	Independent study	64	Exam preparation	16	Final written exam	2	Total	150
Activity	Workload/semester (hours)																
Lectures	39																
Laboratory demonstrations / tutorials	13																
Case-study assignment / report	16																
Independent study	64																
Exam preparation	16																
Final written exam	2																
Total	150																
Student evaluation	<p>Assessment language: English.</p> <p>Methods: written final exam (60%), case-study assignment/report (25%), quizzes/problem sets (15%). Students are informed via the course guide and e-learning announcements.</p>																

5. SUGGESTED BIBLIOGRAPHY

EUDOXUS

To be specified in EUDOXUS.

Additional bibliography for study

- J. Campbell, Complete Casting Handbook.

- D.A. Porter, K.E. Easterling & M.Y. Sherif, Phase Transformations in Metals and Alloys (solidification sections).
- S. Kou, Welding Metallurgy.
- Selected course notes (indicative): MIT Materials Processing / Cambridge materials processing teaching materials.
